SAFE WAYS TO USE EXHAUST FAN

- * Exhaust fan must be fixed at least 4 feet away from cooking gas supplies.
- * Exhaust fan must be used in temperatures equivalent or below 50°C, as most exhaust fans are made of plastic material and could not bear high temperatures.
- * Keep curtains away from exhaust fan. Curtains should not hang over exhaust fan or cause ventilation blockade.
- * Don't let children play with exhaust fan.
- * Consult a professional technician when fixing exhaust fan.
- * Don't keep exhaust fan running for a long time, as it may result in temperature rise and cause fire.
- * For any repair, take the exhaust fan to its dealer or recognized service workshop.

Follow these steps when cleaning an Exhaust Fan

- * Cut off the power supply.
- * Rotate the knob (above blades) anti clockwise and dismantle the blades.
- * Wash blades with warm soapy water, and dry with a clean dry cloth.
- * Don't use petrol, kerosene or any other type of chemical to clean the exhaust fan.
- * Don't use exhaust fan immediately when fixed after cleaning.
